Is your work to do with machinery for fasteners or cold and hot forming presses? Then it is good that you have found us!

As acknowledged professionals in the maintenance, repair and sales of new and rebuilt machinery, we offer expert consulting, many years of experience and, most importantly, a solution based approach.

Together with you, we decide whether your machine needs to be partially or totally rebuilt, or if it requires additional modernisation. For us, the whole process begins when we collect the machine from your factory. From then on, everything – from the initial design and the various processing stages, to final delivery – is handled by us. Our engineers keep you continually informed about the current status of the project, and discuss the further procedures needed with you.

We are there for you – worldwide and around the clock!
